EDUCATION

•**Degree Program in Computer Applications** *2021-2024*

Häme University of Applied Sciences, Hämeenlinna

PROJECTS

•**Kalibro - Site Audit Tool** ***View Live***

A web-based tool for analyzing and enhancing website performance, security, and technical aspects for businesses.

– Provides detailed insights on performance, SEO, security, and technical metrics using APIs like Google Lighthouse.
– Supports data visualization through charts and downloadable PDF reports.
– Technologies Used: React, Flask, PostgreSQL, AWS (S3, Lambda, CloudFront, RDS).

•**Hyper Online Store** ***View Live***

A website-based online store using a mock API for product management.

– Enables users to browse, view, and filter products.
– Technologies Used: React, TypeScript, Redux, MD Bootstrap.

•**Thunder Weather** ***View Live***

A web-based SPA for live weather updates.

– Provides live weather updates from around the globe using AccuWeather API.
– Technologies Used: React, MD Bootstrap, AccuWeather API.

EXPERIENCE

•**Software Developer** *December 2023 – Present*

Calevala Interactive Oy, Remote

– Developing Kalibro, a site audit tool analyzing performance, security, and technical aspects for businesses.
– Building dynamic, scalable, and secure web applications with React and Flask.
– Developed custom APIs to fetch security insights and integrate Google Lighthouse and Google Safe Browsing APIs for analytics.
– Managing data pipelines and storage in PostgreSQL and AWS S3 with seamless integrations.

•**Student Assistant** *August 2023 - May 2024*

Häme UAS, Hämeenlinna

– Assisted first-year students in programming, operating systems, and cloud concepts.

•**Full Stack Developer Trainee** *May 2022 - November 2022*

Integrify Oy, Helsinki

– Focused on frontend and backend development using React, Node.js, and Express.js.
– Worked with DevOps practices like CI/CD and Docker.

TECHNICAL SKILLS

Frontend: HTML, CSS, SCSS, JavaScript, React, Redux, Bootstrap, Material UI, TypeScript
Backend: Node.js, Express.js, Flask, PHP, Java
Databases: MongoDB, MySQL, PostgreSQL
Cloud: AWS (S3, Lambda, RDS, CloudFront), Microsoft Azure
Cybersecurity: Open-source tools, practical Wazuh applications
DevOps: Docker, CI/CD with GitHub Actions and AWS
Soft Skills: Team Player, Problem Solving, Coding as a Hobby

CERTIFICATIONS

•**Microsoft Certified: Azure Fundamentals - AZ-900** *Verification*

•**AWS Certified Cloud Practitioner Certification - CLF-C01** *Verification*
